

Axcient x360Recover Data Sheet

Axcient

The Convergence of Best in Class Axcient BCDR

Axcient has brought together our Replibit, BRC and Fusion BCDR products into the Axcient x360 Platform as Axcient x360Recover. By combining the tech from these products Managed Service Providers (MSPs) get best-in-class RPO and security from Replibit Chain-Free and AirGap, best-in-class RTO with BRC Runbooks and Virtual Office, and best-in-class Direct-to-Cloud tech from Fusion.

All without needing to convert or migrate from your existing Axcient BCDR product, the upgrades happen automatically.

Instead of chasing a multitude of tools to deliver the right solution for each client and causing a headache for techs with vendor sprawl, Axcient x360Recover has the features and flexibility for a variety of clients in one solution. With Axcient x360Recover, MSPs can support tiered BCDR offerings all the way from budget-conscious clients with lower RPO and RTO requirements to clients where even 1-hour of downtime is unacceptable. And every Axcient option incorporates critical capabilities like Chain-Free, AirGap, AutoVerify, Virtual Office and Unlimited Storage and Retention. Eliminate the overhead and costs of vendor sprawl with a unified experience that decreases downtime, increases productivity, and keeps businesses running securely.

Axcient x360Recover comes complete with cutting-edge security and data protection technologies that make BCDR secure by design. Guarantee clients uninterrupted business continuity even after a sophisticated ransomware attack or data corruption with built-in protections AirGap and AutoVerify.

With supported integration into popular PSA/RMM tools so that AutoVerify data and bootVM screenshots can be seamlessly captured. Axcient x360Recover supports alerting and escalation rules so that techs are only notified when absolutely required. As part of Axcient x360Recover by default, you know AutoVerify intelligently tests your backup integrity, every time.

KEY FEATURES:

Protect Everything:

Support for Windows, Linux, VMware, Hyper-V, and IaaS

Direct-to-Cloud:

Remove the local device and associated costs, when local failover is not as critical

AirGap:

Never pay the ransom – AirGap safety archive ensures protection in the case of malware

AutoVerify:

AutoVerify verifies the data on the protected system prior to initiating the backup process

Bring Your Own Device:

Purchase or lease hardware from Axcient or BYOD. x360Recover installs in < 10-minutes on any Ubuntu certified hardware

Bring Your Own Cloud:

Take your 3-2-1 backup strategy to the next level. Local backup and recovery with an onsite appliance, sync to your Data Center or Cloud, and sync to Axcient's Cloud

One-click Restore:

Full virtual office capabilities to instantly failover single servers or entire sites almost immediately and automate recovery with Axcient Runbooks

Keep This, And Get That...

Here is what you have to look forward to with x360Recover – the best of Axcient BCDR.

REPLIBIT:

- + 15-minute recovery point objective (RPO)
- + Chain-Free image-based backup
- + Industry best-in-class efficiency for data management
- + No manual re-seeding
- + Instant local virtualization

BRC:

- + Instant virtualization of cloud recovery points
- + Less than 1-hour recovery time objective (RTO)
- + Point-and-click cloud disaster recovery with Virtual Office
- + Simple, wizard-driven management and recovery experience through Automated Runbooks

FUSION:

- + Hypervisor-based backup
- + Direct-to-cloud and advanced de-duplication tech

“ Axcient x360Recover combines the best of Axcient BCDR to provide industry leading RPO, RTO, and security to our MSP partners. The name x360Recover represents features unique to Axcient like Chain-Free, AirGap, and AutoVerify – ensuring MSPs can always recover their client data. We are proud to accelerate our BCDR roadmap for MSPs and fulfill our mission to keep business running.

– David Bennett, CEO at Axcient

ABOUT AXCIENT:

Axcient x360 is the proven business continuity and cloud migration solution for Managed Service Providers (MSPs). The Axcient x360 platform includes Replibit, BRC, CloudFinder, Anchor, Fusion, and the Axcient Cloud. MSPs and their clients depend on us to protect their data and ensure business continuity in the event of security breaches, human error, and natural disasters. Our focus on partner experience has resulted in more than 3,000 MSP customers throughout the world.
